TAB

4.1 DESIGN PHASE (General)

A. Introduction

  1. Brief Narrative of the Project Design
  2. Functional System Chart

B. Project Requisites

  This section should include all requirements
  for Design Integration (e.g., Historical require-
  ments; the need for on-line updating, etc.)

C. Assumptions

  There are assumptions necessary to fill any
  void encountered during design, and in some
  cases, they may overlap the unresolved area.
  (e.g., It is assumed that there will be project
  flags or a Main-ID section).

D. Unresolved Areas

  Major points or policy decisions which remain
  unresolved and will have a subsequent impact
  on project design should be listed in this
  section. Hopefully, a small addendum can be
  made to the Design Phase when these areas are
  resolved.

~~interface with '5½x5' system~~ for the ~~production~~ of the Language Coded Reporter

30 oct 72

1o. Use of OLD or NEW Language Proficiency Codes in Phase II is unresolved pending a joint Office of Personnel, Office of Training, and Office of Computer Services — decision.

2. Layout of <u>converted</u> IBM 360 Language Master is not defined as of above date.
